## “Mobile Shop System”

### 1. Introduction:

The project is developed for manage the mobile shop system. To simplify the management for the owner to update, delete and add new mobiles and all over the information of branded and used mobile branded mobile owned by the owner of shops and used mobile are those which a local seller came to sell. And also collect the information of mobiles who bought from the shop.

- Software will help you conveniently manage the mobiles data.
- Easy to collect, adequately mobiles information.

### 2. Purpose:

Purpose of this project for easily handling large adequately mobiles and large shop. To convert it to computerize rather than page information or other storage devices. To check conveniently details about mobiles. Some key points are written bellow:

- To simplify the selling system.
- For searching easily in enormous of mobiles.
- Store information of buyer and seller.
- Conscious about every transaction.
- To precise the functionality.
- To add, update, and delete the information.
- Consistency in data.
- Reduce data dependency.

### 3. Scope:

To maintain all the activity and process done by admin and removal in data dependency. Also, I have created this project for our mobile shop. And project would help me a a lot to manipulating the data. Handled by only the admin of shop. Merely admin will handle and perform all the functionality which is secure.

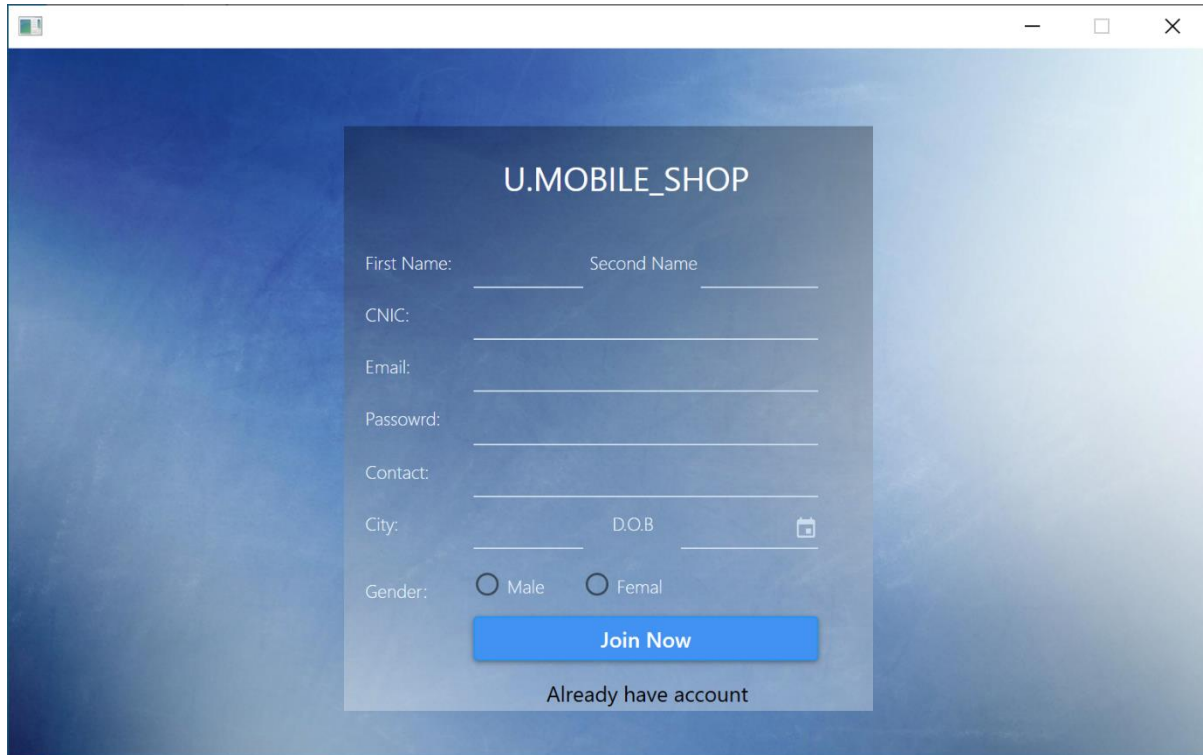

### 4. Functions:

- Add new mobile and store.
- Delete mobile.
- Store sold mobile information.
- Update mobile information.
- Update admin information.
- Store used mobile and seller information.
- Store new mobile information
- Add Buyer information.

## 5. Module:

### 5.1 Signup:

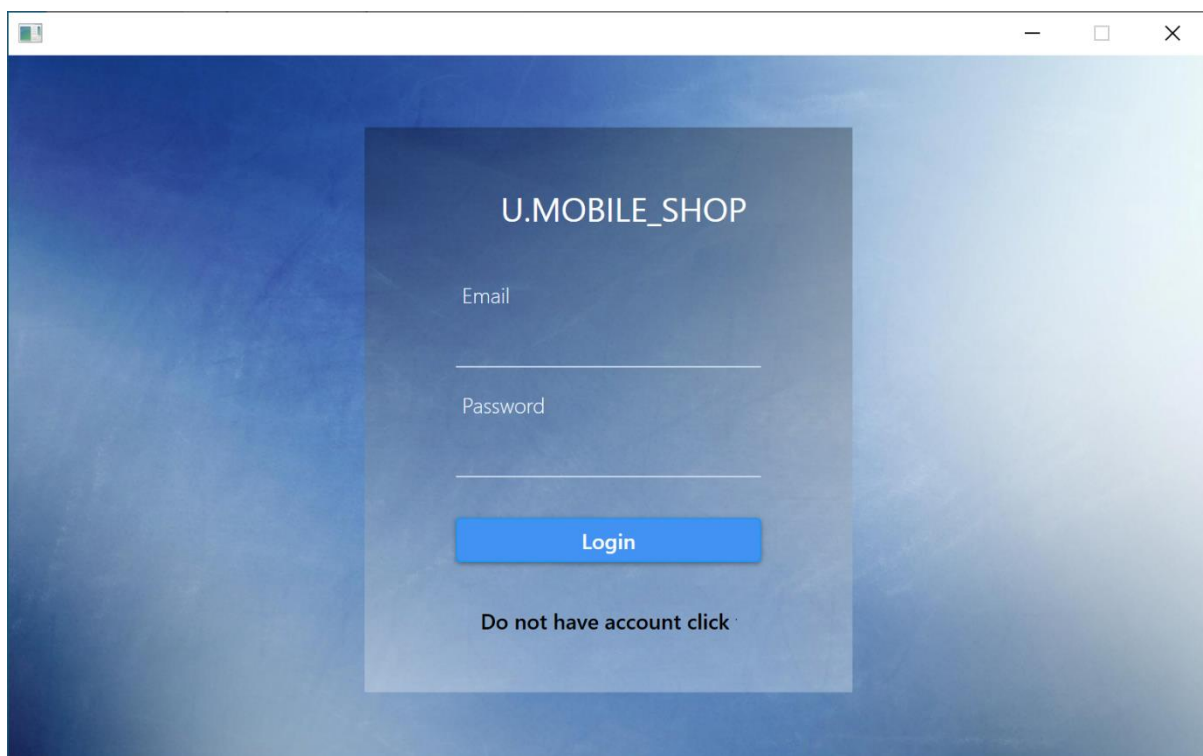

In commencement you have to sign up for using this application if you already had account then you can't signup.

The image shows a web browser window displaying the 'U.MOBILE\_SHOP' signup form. The form is centered on a blue background. It includes input fields for 'First Name', 'Second Name', 'CNIC', 'Email', 'Passowrd', 'Contact', 'City', 'D.O.B', and 'Gender' (with radio buttons for 'Male' and 'Femal'). A blue 'Join Now' button is at the bottom of the form, and a link 'Already have account' is below it.

### 5.2 Login:

Insert the correct username and password for accessing the application.

The image shows a web browser window displaying the 'U.MOBILE\_SHOP' login form. The form is centered on a blue background. It includes input fields for 'Email' and 'Password'. A blue 'Login' button is at the bottom of the form, and a link 'Do not have account click' is below it.

### 5.3 Add Mobile:

#### 5.3.1 New Mobile:

New mobile is owned by admin doesn't need to provide all seller name etc.

Company:	Samsung	Mobile Name:	Note 10
Serial No:	084738	Color:	White
Ram:	6GB	Rom	128GB
Front Camera:	6MP	Rear Camera	16MP
Price Mobile:	98000	<input checked="" type="radio"/> Brand New <input type="radio"/> Used Mobile	

**Add**

#### 5.3.2 Used Mobile:

In used mobile you need to provide the seller information.

Company:	Samsung	Mobile Name:	Note 10
Serial No:	084738	Color:	White
Ram:	6GB	Rom	128GB
Front Camera:	6MP	Rear Camera	16MP
Price Mobile:	98000	<input type="radio"/> Brand New <input checked="" type="radio"/> Used Mobile	
Cnic:	371017468393	Name	Umar Khayam
Address:	Hazro	Contact	03487961457

**Add**

## 5.4 Stock:

In stock available mobiles are shown used and branded.

### 5.4.1 New Mobile.

Search with name/company

New Used

Company	Mobile	Serialno	Color	Ram	Rom	Front	Back_	Price
Nokia	A7	98638	Light Green	4GB	32GB	4MP	6MP	300

Insert serial number

Ok

### 5.4.2 Used mobile:

Search with name/company

New Used

Company	Mobile	Serialno	Color	Ram	Rom	Front	Back_	Price
Huawei	O3	87382	Silver	6GB	512GB	8MP	32MP	35500.0

Insert serial number

Ok

## 5.5 Customers details:

### 5.5.1 Buyer:

Insert Cnic/Name

**Buyer** **Local Mobile**

Name	Address	Contact	Cnic	Company	Mobile
Fahad Mehmood	Kamra	32087388731	3710176839271	Iphone	X SMax
Daniyal	Hazro	346789267	3710176874362	Oppo	F5

### 5.5.2 Seller:

**Buyer** **Seller**

Name	Address	Contact	Cnic	Company	Mobile
Ukassha Mehmood	Hazro	3478726457	3710587392849	Huawei	O3

5.6 Delete mobile:

5.6.1 New Mobile:

Add Mobile

Stock

Customers Record

Delete Mobile

Admin

Insert name or serial no

Q

Import

Local

Company	Mobile	Serialno	Color	Ram	Rom	Front	Back_	Pr
Nokia	A7	98638	Light Green	4GB	32GB	4MP	6MP	3

Serial no

Delete

5.6.2 Used Mobile:

Add Mobile

Stock

Customers Record

Delete Mobile

Admin

Insert name or serial no

Q

Import

Local

Company	Mobile	Serialno	Color	Ram	Rom	Front	Back_	Pr
Nokia	A7	98638	Light Green	4GB	32GB	4MP	6MP	3

Serial no

Delete

## 5.7 Admin:

In this module admin can change the password of account.

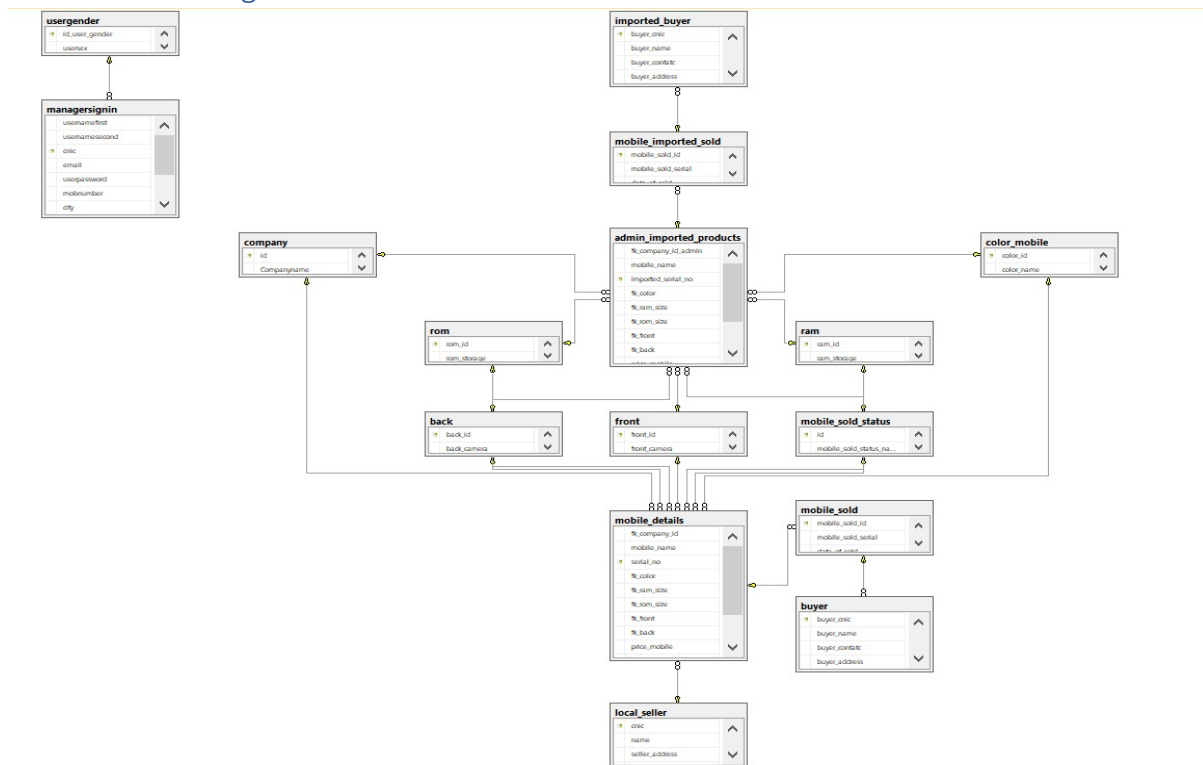

The screenshot shows a web application window with a blue sidebar on the left and a main content area. The sidebar contains five buttons: 'Add Mobile', 'Stock', 'Customers Record', 'Delete Mobile', and 'Admin'. The 'Admin' button is highlighted with a dotted border. The main content area has a light blue background and contains the following elements:

- A heading 'Want to change password?' in red text.
- Two input fields: 'Old Password:' and 'New Password:'.
- A blue 'Ok' button centered below the input fields.

## 6 Database:

I prefer Sql database to store all over the record of mobiles.

### 6.1 Database Diagram:

## 6.2 Store Procedure:

```

---
---Changing status to sold for local seller products
---

drop proc for_changing_status
create proc for_changing_status
@serial_no int,
@date date
as begin
select serial_no from mobile_details
update mobile_details
set fk_mobile_sold_status=1
where serial_no=@serial_no
insert into mobile_sold values(@serial_no,@date)
end

---
---Changing status to sold for admin products
---

create proc for_imported_status
@imported_serial_no int,
@date date
as begin
select imported_serial_no from admin_imported_products
update admin_imported_products
set fk_mobile_sold_status=1
where imported_serial_no=@imported_serial_no
insert into mobile_imported_sold values(@imported_serial_no,@date)
end

---
---Proc as view mobile details
---

drop proc mobile_view
create proc mobile_view
as begin
select
Companyname,mobile_name,serial_no,color_name,ram_storage,rom_storage
,front_camera,back_camera,price_mobile
from mobile_details
join company
on mobile_details.fk_company_id=company.id
join ram
on ram.ram_id=mobile_details.fk_ram_size
join rom

```

```

on rom.rom_id=mobile_details.fk_rom_siz
join color_mobile
on color_mobile.color_id=mobile_details.fk_color
join front
on front.front_id=mobile_details.fk_front
join back
on back.back_id=mobile_details.fk_back
where fk_mobile_sold_status=2
end

---
---Admin products view
---

drop proc admin_view_products
create proc admin_view_products
as begin
select
Companyname,mobile_name,imported_serial_no,color_name,ram_storage,ro
m_storage,front_camera,back_camera,price_mobile
from admin_imported_products
join company
on admin_imported_products.fk_company_id_admin=company.id
join ram
on ram.ram_id=admin_imported_products.fk_ram_size
join rom
on rom.rom_id=admin_imported_products.fk_rom_size
join color_mobile
on color_mobile.color_id=admin_imported_products.fk_color
join front
on front.front_id=admin_imported_products.fk_front
join back
on back.back_id=admin_imported_products.fk_back
where fk_mobile_sold_status=2
end
execute admin_view_products

---
---Buyers details view
---

drop proc buyers_details
create proc buyers_details
as begin
select buyer_name, buyer_address, buyer_cnic,
buyer_contatc,Companyname,mobile_name,price_mobile,date_of_sold
from buyer
join mobile_sold
on buyer.fk_mobile_sold_id=mobile_sold.mobile_sold_id

```

```
join mobile_details
on mobile_sold.mobile_sold_serial=mobile_details.serial_no
join company
on company.id=mobile_details.fk_company_id
where fk_mobile_sold_status=1
end
execute buyers_details execute buyers_imported

---
---buyer imported view
---

create proc buyers_imported
as begin
select buyer_name,buyer_address,buyer_cnic,
buyer_contatc,Companyname,mobile_name,price_mobile,date_of_sold
from imported_buyer
join mobile_imported_sold
on
imported_buyer.fk_mobile_sold_id=mobile_imported_sold.mobile_sold_id
join admin_imported_products
on
mobile_imported_sold.mobile_sold_serial=admin_imported_products.impo
rted_serial_no
join company
on company.id=admin_imported_products.fk_company_id_admin
where fk_mobile_sold_status=1
end
drop proc buyers_imported

---
---Seller details
---

create proc seller_details
as begin
select
name,seller_address,contact_number,cnic,Companyname,mobile_name,mobi
le_order_date,price_mobile
from mobile_details
join local_seller
on local_seller.cnic=mobile_details.fk_cnic
join company
on company.id=mobile_details.fk_company_id
end
```

### 6.3 Triggers:

```
---  
---Increase in price of 500 after inserting local seller mobile  
---  
create trigger increas_price  
on mobile_details  
for insert  
as begin  
update mobile_details  
set price_mobile=price_mobile+500  
end
```

### 6.4 Constraint:

```
---  
---constraint for default gender  
---  
alter table managersignin  
add constraint for_auto_gender  
default 1 for usergender_id  
  
---  
---constraint for mobile sold status  
---  
  
alter table mobile_details  
add constraint mob_sold_default  
default 2 for fk_mobile_sold_status  
  
alter table mobile_details  
add constraint mob_front  
default 1 for fk_front  
  
alter table mobile_details  
add constraint mob_back
